February 6, 2009 - For Immediate Release

C-CORE Wins Second Provincial Award in 10 Months

C-CORE has won the Newfoundland and Labrador Employers Council *Small Employer of Distinction Award for 2009*. The award recognizing leadership, innovation, creativity and a healthy, safe and motivated workforce adds to the impressive accolades that C-CORE has garnered over the past year. In April 2008 C-CORE was presented with the Department of Innovation and Trade and Rural Development's *Distinction in Innovation Award*.

Dr. Charles Randell, President and CEO of C-CORE says "C-CORE business is applied research and development to solve those very tough problems that challenge a variety of industries. C-CORE's product – innovative solutions - is generated entirely by the intellect and imagination of our staff. Over the past year we have worked on every continent on Earth, and in many of the oceans. It's a global market and our clients will go anywhere in the world to get the top talent. They come here to this province, to C-CORE. We work very hard, drawing on our relationship with Memorial University and anywhere else we can to be the employer of choice in research and development. This award is a great message to us that we're on the right track.

C-CORE also congratulates Browning Harvey on being the Employer of Distinction in the large employer category

Based in St. John's, Newfoundland with offices in Halifax, Nova Scotia and Ottawa, Ontario C-CORE is a global corporation providing innovative engineering services in the areas of radar and vision systems ice engineering and geotechnical engineering.
