LOCAL COMPANY SURPASSES MILESTONE

St. John's, Newfoundland, Canada – January 9, 2007 – Fueled by annual growth of more than 40%, C-CORE continues its impressive growth and will break through the \$10 million dollar revenue milestone this fiscal year. Dr. Charles Randell, President and Chief Executive Officer at C-CORE states “these are exciting times at C-CORE as we continue to evolve our service offerings throughout the world. For the oil and gas component of our business, we set an ambitious target to double foreign contracts this year. Through aggressive marketing, defining our niche and doing excellent work, we have achieved an increase of over 300%”. As C-CORE expands it is successfully recruiting very highly qualified Newfoundlanders and Labradorians from across the country and around the world to return home to work and grow, not only C-CORE, but the province’s reputation as a leading player in the development and provision of advanced engineering services and solutions.

Based in St. John's, Newfoundland, C-CORE is a global corporation providing innovative engineering services in the areas of remote sensing, intelligent systems, ice engineering and geotechnical engineering.
