

## Sadie Sellars, P.Eng., FEC; Research & Development Manager, ExxonMobil Canada

Sadie Sellars holds a Bachelor of Engineering (Civil) degree from Memorial University, is a registered Professional Engineer with Professional Engineers and Geoscientists Newfoundland and Labrador (PEGNL) and is a Fellow of Engineers Canada.

Sadie has over 30 years industry experience working in a series of progressive roles associated with the development and modification of offshore oil and gas facilities. Sadie's career with ExxonMobil began in St. John's in 2003 as Hibernia Construction / Projects Lead and in 2005 she was appointed Projects Supervisor – ExxonMobil Canada East. In this role, she was responsible for all aspects of facility modifications for both the Hibernia and Sable Assets. In 2008 she moved to Houston, Texas where she became a Project Advisor responsible for providing project execution planning support for production affiliates in various international locations. In 2012 Sadie returned to St. John's to become the Technical Manager for the Hebron Project and in 2017 moved into the role of R&D Manager.

Sadie believes in mentoring young professionals, particularly young women. She is proud to have been a founding member and former president of Women in Science and Engineering (WISE-NL) and for establishing ExxonMobil's Women's Interest Network within the local affiliate. She has also actively participated in the 150 Years Mentorship Program through Memorial University for a number of years.

Sadie has been a member of the C-CORE Board of Directors since 2013.
